

HIGH-PERFORMANCE ALLOYS AND CRITICAL MATERIALS

Technical supply partner for *Critical Applications*

Premiere Advanced Materials supplies nickel, cobalt, duplex, super duplex and related alloys with grade clarity, heat-number traceability and documentation review for purchase, QC and engineering teams.

ISO 9001
Certified QMS

3.1
EN 10204 MTC support

100%
Heat-number traceability focus

Pan-India
Supply and support

NICKEL ALLOYS

Heat, corrosion and sour service

Inconel, Hastelloy and Monel grades for valve, oil and gas, process and high-temperature applications.

718 / 625 / 825 / C276 / Monel 400-K500

COBALT ALLOYS

Wear and hardfacing supply

Stellite grades for trims, seats, rods, powders, contact surfaces and engineered wear applications.

Stellite 6 / 12 / 21 / rods / powders

DUPLEX GRADES

Strength and chloride resistance

Duplex and super duplex grades where condition, PREN, ferrite and corrosion-test awareness matter.

2205 / 2507 / Zeron 100 / PREN review

WHY BUYERS USE US

- Grade, form, condition, standard and timeline review before supply.
- MTC, heat number, marking and dispatch details checked for consistency.
- Cut-size, project quantity and document scope clarified before PO.

SUPPLY FORMS

- Round bars, flat bars, rods, sheets and plates.
- Tubes, pipes, forgings and powders where grade availability supports the order.
- Domestic dispatch and export enquiries reviewed by requirement.

INDUSTRIES SERVED

Material support for critical equipment, corrosion service and documented industrial supply.

Valve & pump OEMs

Oil & gas projects

Power & energy

Chemical process plants

Marine & desalination

Maintenance & fabrication

Alloy supply, documentation and dispatch support

Capability snapshot for teams sourcing nickel, cobalt, duplex, super duplex and related high-performance alloys for critical applications.

CORE SUPPLY FAMILIES

FAMILY	SUPPLY FOCUS	DOCUMENTATION / REVIEW
Nickel superalloys	Inconel 718, 625, 825; Hastelloy C276 / X; Monel 400 / K500 in bars, plates, sheets, tubes and pipes.	ASTM / ASME match, condition, chemistry, mechanicals, heat number and EN 10204 3.1 MTC review.
Cobalt alloys	Stellite 6, 12 and 21 for rods, powders, valve trims, seats, hardfacing and wear-facing requirements.	Grade, form, hardness range, drawing, procedure and application fit checked before supply.
Duplex grades	Duplex 2205, Super Duplex 2507 and Zeron 100 for marine, offshore, desalination and chloride service.	PREN, ferrite, solution anneal, ASTM / UNS alignment and corrosion-test scope where specified.
Supply forms	Round bars, flat bars, rods, sheets, plates, tubes, pipes, forgings and powders where grade availability supports the order.	Size, tolerance, cut length, packing, marking and dispatch details aligned to the purchase requirement.

SUPPORT SCOPE

AVAILABILITY ROUTE

Stock, cut-size, source-arranged supply and mill-indent options are reviewed against the exact RFQ.

INSPECTION SUPPORT

PMI, hardness, NDE, ferrite, corrosion testing and client-nominated TPI can be coordinated when included in scope.

PROCUREMENT PACK

Quotation, PI, ISO certificate, company profile and vendor-onboarding details can be shared for active enquiries.

HELPFUL ENQUIRY DETAILS

Material: grade / UNS, product form, size, tolerance and condition.

Quantity: pieces, kilograms, full length, cut length or project lot.

Standard: ASTM / ASME / EN / NACE / API / customer specification.

Supply scope: MTC, tests, TPI, packing, destination and target dispatch date.

VENDOR ONBOARDING

GST, PAN, IEC, MSME / UDYAM where applicable, bank details, ISO 9001 certificate, company profile, vendor forms and MSA review on active enquiries.
